DV II Sketch

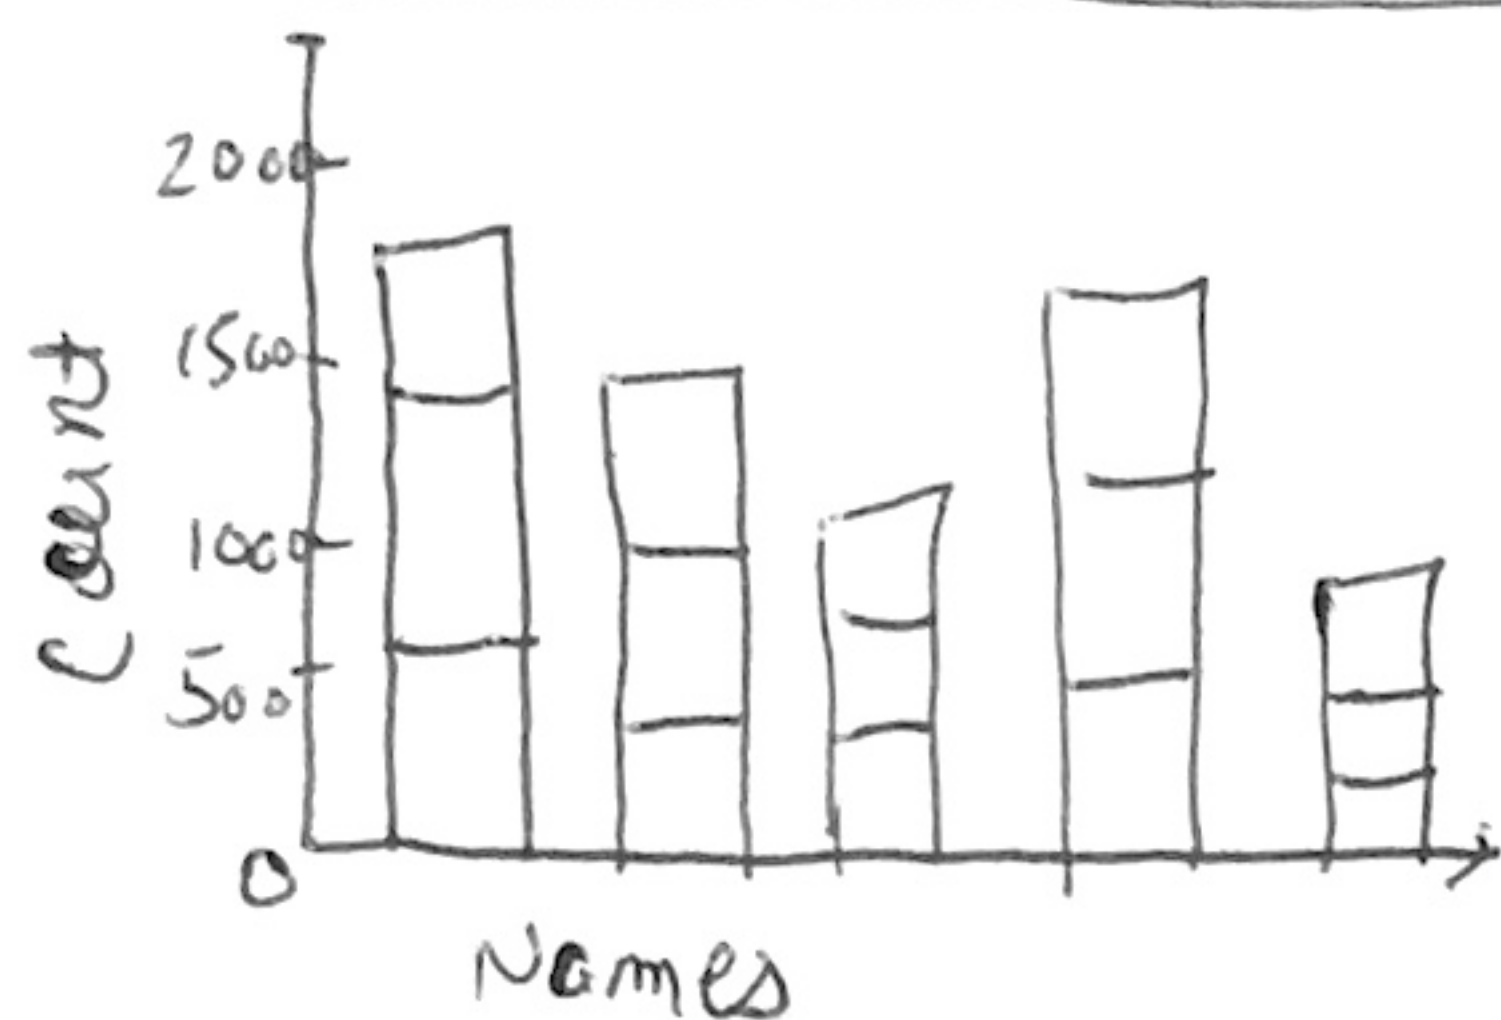

Australia's Threatened Biodiversity Species, Communities and Conservation Insights.

Target Audience - General Public Australia, Students.
Goal - Raise awareness about Australia's biodiversity crisis.

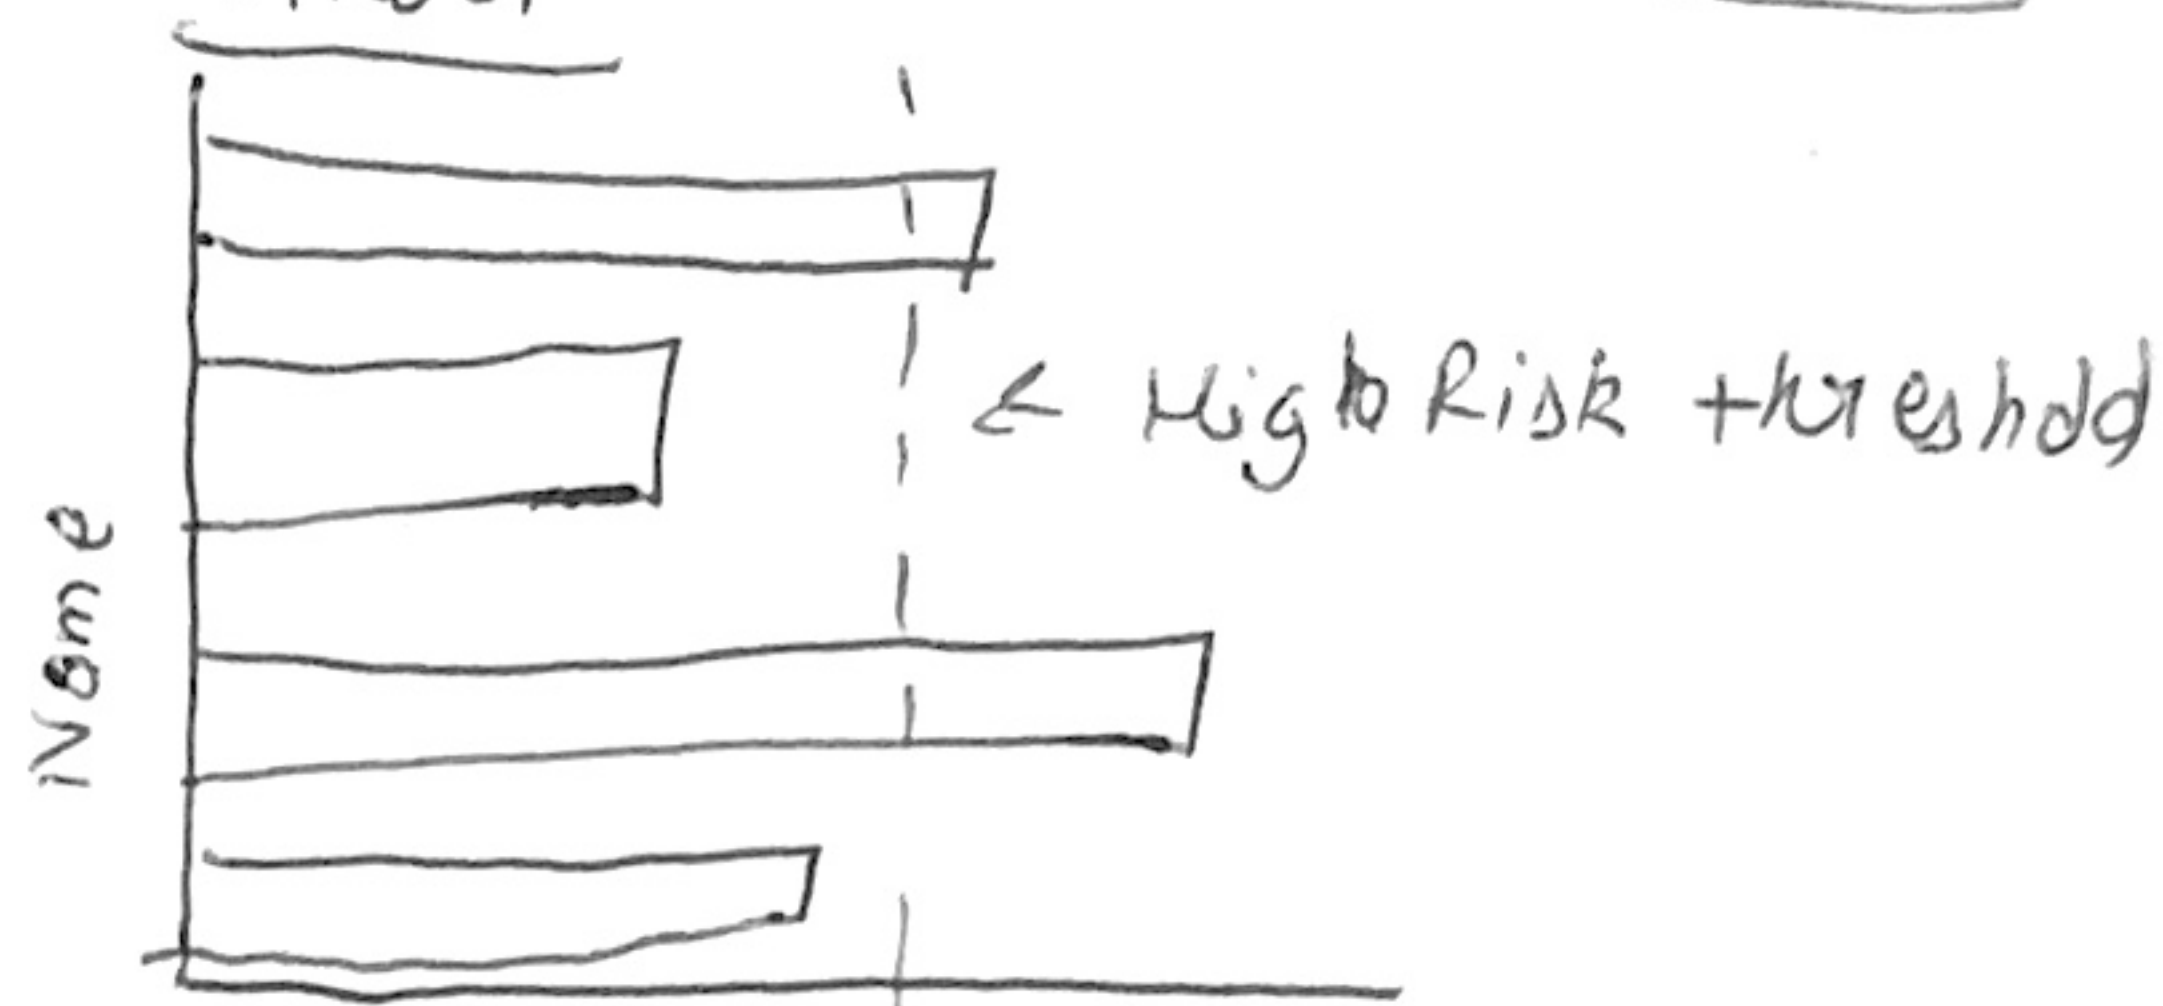

1) THE BIG PICTURE

How threatened species are distributed across biological groups and threat levels.

A) THREAT LEVEL BY GROUP

B) CRITICALLY ENDANGERED BY GROUP

2) WHERE PRESSURE IS HIGHEST

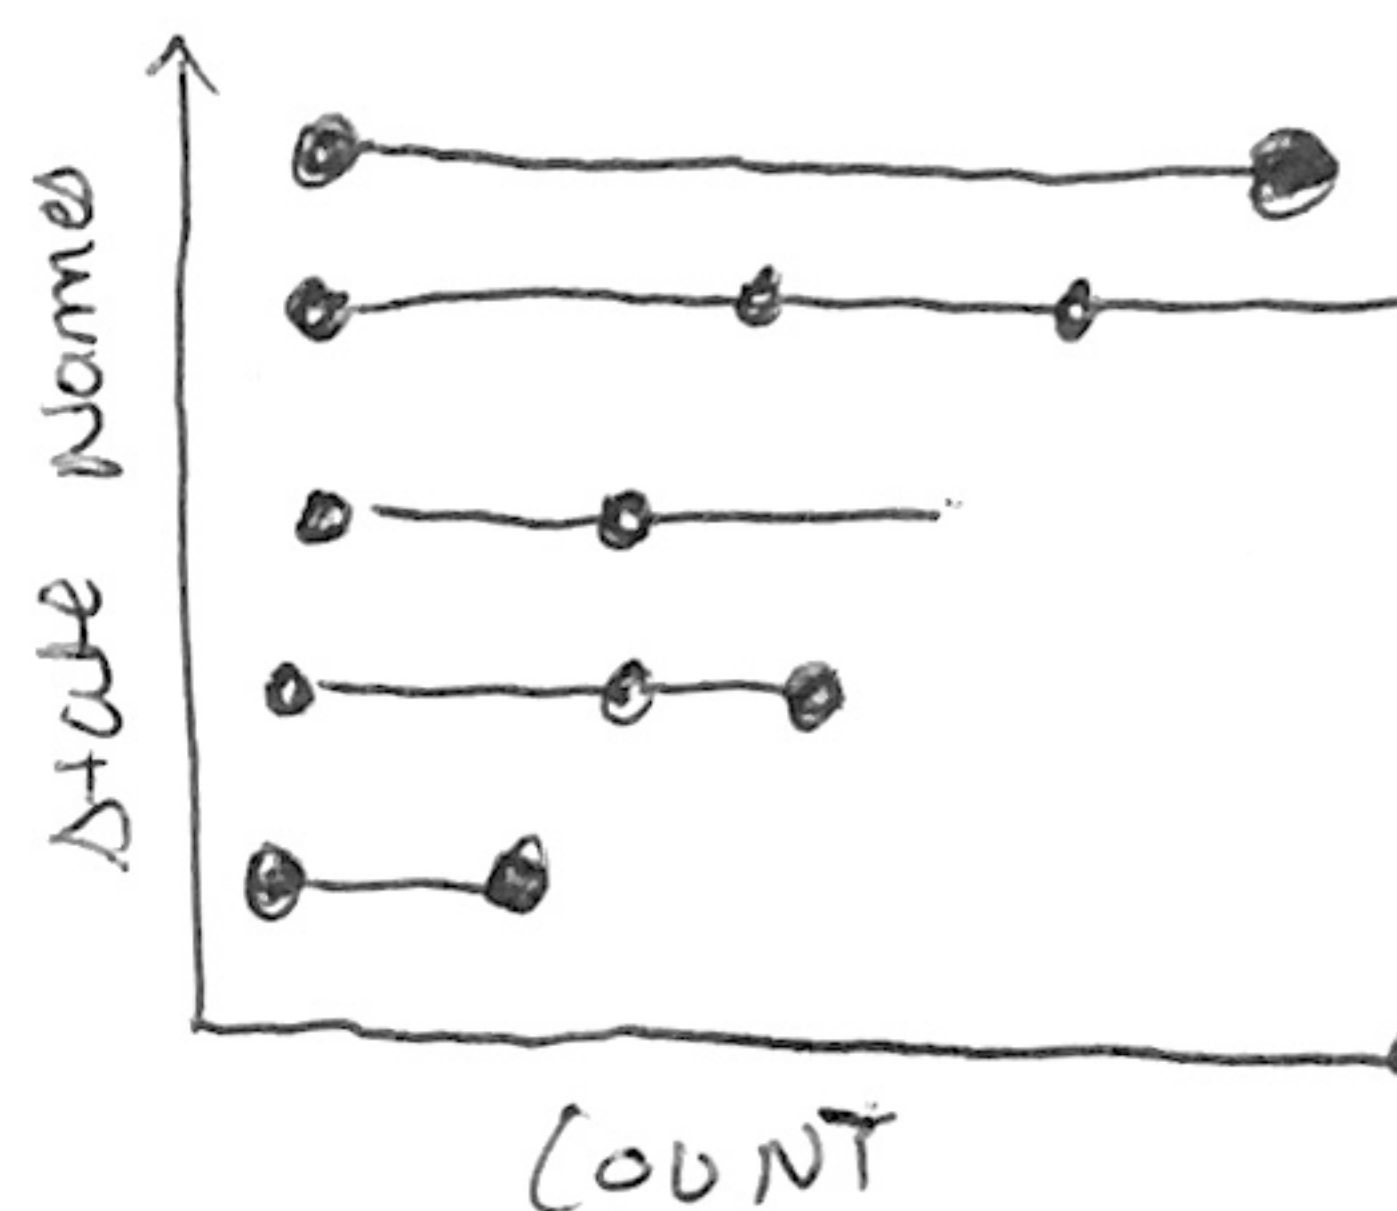

A) THREATENED SPECIES BY STATE

Comparing species and community threats across Australian states and territories

3) ECOLOGICAL COMMUNITIES AT RISK.

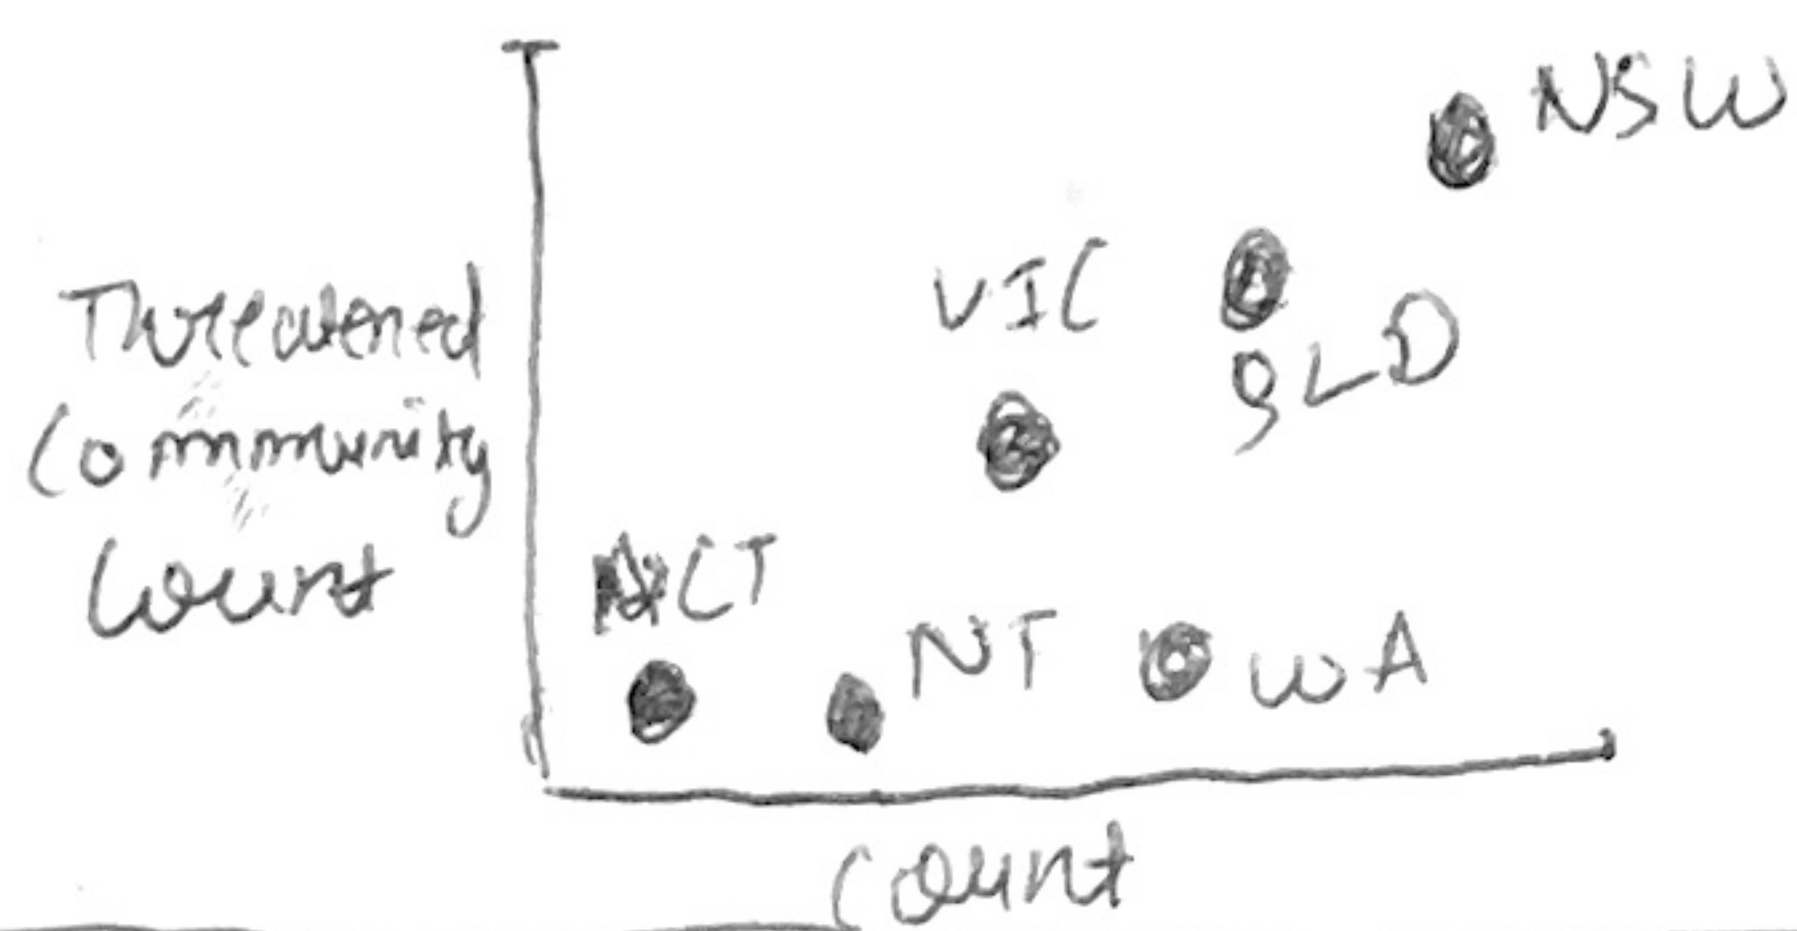

A) COMMUNITIES BY STATE

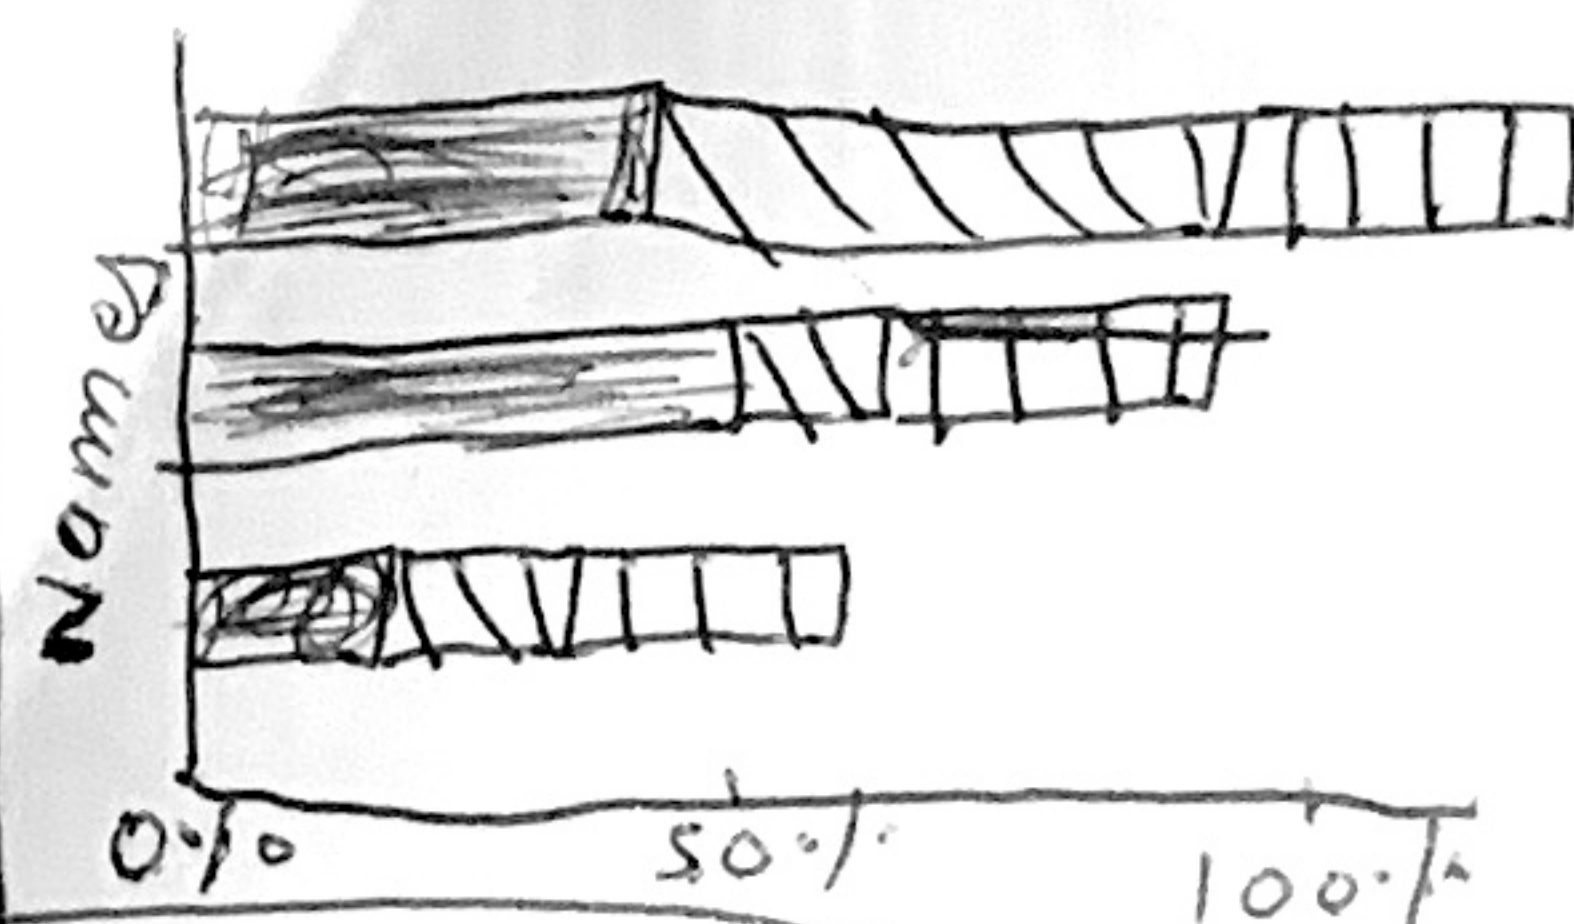

* Exploring threatened ecological communities across Australia

4) COMPARING STATES AND GROUPS

A) Multi-dimensional views to reveal outlines and vulnerable groups

B) THREAT LEVEL COMPOSITION BY VERTEBRATE GROUP (STACKED)

INSIGHT-

Australia's Biodiversity is under severe pressure, especially for frogs, invertebrates and ecological communities in NSW.
